

After I got to sprint you can tell they are way better than the AT&T. It would help Sprint to get T-Mobile because it would give them better service here in Oklahoma and all over. There is more people that like sprint because there plans is not so bad at all. And they do not get mad for using you cell phones data. There are getting way better customer satisfaction then it was 2 years ago did not want to call sprint pay my bill lol but not now they have gotten a lot better I love to call them and talk about how good of a job they are doing.

According to a survey released by [The American Customer Satisfaction Index](#), Sprint Nextel Corp. now has one of the highest customer service scores in the industry. While Sprint excelled, two of the largest American carriers, AT&T and T-Mobile USA, were given lower marks that could drop even further pending the merger.....

Sprint CEO Dan Hesse has been keen on improving customer service within Sprint, whose subsidiaries include Boost Mobile and Virgin Mobile, two companies that offer mobile service without the two year subscription.

Here is a web site to look at the AMERICAN CUSTOMER SATISFACTION web site.

Fcc I hope you do give sprint T-Mobile because like I sad sprint is getting better and they need to get t-mobiles towers to help the keep going. If you give it to at&t you are creation a monopoly of the worst king!!!

Sincerely

Kasey Kelley
